Fortran 95/2003 for Scientists & Engineers

- **Author : Stephen J. Chapman**
- **Publisher : McGraw-Hill Education, 2007**
- **pages : 1008 pages**
- **N° Class : 621/675**

Chapman's *Fortran for Scientists and Engineers* is intended for both first year engineering students and practicing engineers. This text is the **most current alternative for Fortran.** It simultaneously **teaches the Fortran 95/2003 programming language, structured programming techniques, and good programming practice.** Among its strengths are its concise, clear explanations of Fortran syntax and programming procedures, the inclusion of a wealth of examples and exercises to help students grasp difficult concepts, and its explanations about how to understand code written for older versions of Fortran.
