The only book you need for programming VisiBroker using Java

The most widely used commercial implementation of the CORBA standard, Inprise's VisiBroker, is used by hundreds of thousands of developers worldwide. Written by a team of Inprise insiders, this updated and expanded Second Edition of the #1 guide to programming VisiBroker helps Java developers quickly master the skills they need to develop more powerful and sophisticated distributed, object-oriented, client/server systems, from scratch or with existing components using VisiBroker 4. New topics covered in this edition include migrating VisiBroker 3 to version 4; the Portable Object Adaptor; implementing the Objects by Value feature; the VisiBroker Interface Repository; Dynamic Programming APIs for use with scripting; and more.

CD-ROM contains VisiBroker for Java 4, VisiBroker Naming and Event Services, and complete code for all examples in the book.
