

```

// ----- Get Methods -----
function get_dog_name()
{
return $this->dog_name;
}
function get_dog_weight()
{
return $this->dog_weight;
}
function get_dog_breed()
{
return $this->dog_breed;
}
function get_dog_color()
{
return $this->dog_color;
}
function get_properties()
{
return "$this->dog_name,$this->dog_weight,$this->dog_breed,$this->dog_color.";
}
// -----General Method-----
private function validator_breed($value)
{
$breed_file = simplexml:load_file($this->breedxml);
$xmlText = $breed_file->asXML();
if(stristr($xmlText, $value) === FALSE)
{
return FALSE;
}
else
{
return TRUE;
}
}
?>

```

The Dog application now has three complete tiers.
